The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

09/594,368

Applicant(s)

LITTLE, HERB A.

Examiner

Tamara Teslovich

Art Unit

2137

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 January 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-45 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-45 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date: _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date: _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

This Office Action is in response to Applicant's Remarks and Amendments filed January 16, 2008.

Claims 1, 16, and 31 are amended.

Claims 1-45 are pending and herein considered.

Response to Amendments and Arguments

Applicant's arguments filed January 16, 2008 have been fully considered but they are not persuasive.

Insofar as Applicant's claim amendments fail to overcome the Examiner's previously set forth 112 enablement and indefiniteness rejections of claims 1-45 for those reasons given below, the Examiner has no choice but to maintain her 35 USC 102(e) rejection of claims 1-45 as well.

Applicant's addition of the phrase "for each message transaction" to independent claims 1, 16, and 31 fails to overcome the Examiner's previously set forth 112 enablement and indefiniteness rejections. Although Applicant's remarks maintain that the addition of the above-mentioned limitation makes it clear the duration of the key, Applicant's introduction of a new phrase into his claims, a phrase unsupported by Applicant's disclosure, fails to further limit Applicant's claims. Although Applicant draws attention to the Examiner's previous Office Action for support for the addition, it remains

Applicant's duty to make sure that his claim amendments do not introduce new matter unsupported by his disclosure. Furthermore, nowhere does Applicant provide for the deletion or destruction of the keys nor can his added limitation be taken as limiting any uses of the keys outside the encryption of messages. Whether or not Applicant intends to maintain the keys and use them for alternate purposes is unclear from the existing claim language. The Examiner has no choice once again but to maintain her 112 rejections of claims 1-45 until they are amended to clarify the extent and duration of the ephemeral key pair such that a person skilled in the art would be understand the point at which the ephemeral keys are to expire as ephemeral keys do.

The remaining 35 USC 112 issues mentioned above and further explained below render the claims indefinite, and as such the Examiner has no choice but to maintain her 35 USC 102 rejection of claims 1-45 in view of Schneier insofar as she understands the reference to include those elements of the invention particularly claimed by the Applicant in his claims.

Claim Rejections - 35 USC § 112, 1st Paragraph

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention. The Applicant's use of an "ephemeral key pair" more than once is non-enabling because the common technological use of "ephemeral key pairs" requires that they are created, used once, and destroyed immediately thereafter. Applicant's specification fails to clear up the issue insofar as the Applicant fails to provide for the destruction of the keys or even a suggestion as to the extent the keys are to be utilized. As the claims stand, it is unclear how many more times the ephemeral key pair can and will be used and whether or not they will ever expire.

Claims 1-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The Examiner has conducted a thorough examination of Applicant's disclosure prior to the current amendment and has been unable to find any reference whatsoever to a "message transaction" in his claims, specification, or otherwise.

Claim Rejections - 35 USC § 112, 2nd Paragraph

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Where applicant acts as his or her own lexicographer to specifically define a term of a claim contrary to its ordinary meaning, the written description must clearly redefine the claim term and set forth the uncommon definition so as to put one reasonably skilled in the art on notice that the applicant intended to so redefine that claim term. *Process Control Corp. v. HydReclaim Corp.*, 190 F.3d 1350, 1357, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999). The term "ephemeral key pair" in claims 1, 16, and 31 is used by the claim to mean "use more than once", while the accepted meaning is "use once and destroy." The term is indefinite because the specification does not clearly redefine the term. Applicant's specification fails to clear up the issue insofar as the Applicant fails to provide for the destruction of the keys or even a suggestion as to the extent the keys are to be utilized. As the claims stand, it is unclear how many more times the ephemeral key pair can and will be used and whether or not they will ever expire.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

**Claims 1-45 remain rejected under 35 U.S.C. 102(e) as being anticipated by
Schneier et al., US Pat 5,956,404.**

Regarding **Claims 1, 16, and 31**, Schneier teaches a public-key encryption process and system for communicating messages between a sender and a receiver in a plurality of message transactions comprising the steps of or each message transaction: a) encrypting a plaintext message into a ciphertext message, the encrypting step includes the step of producing an ephemeral key pair that is used to encrypt the plaintext message (see Schneier col.1 lines 28-44); and b) generating a digital signature for the ciphertext message using the ephemeral key pair produced in the encrypting step (see Schneier col.1 lines 45-65); wherein the ephemeral key pair used in the encrypting and generating steps is used for a single message transaction in the plurality of message transactions between the sender and the receiver.

Regarding **Claims 2, 17, and 32**, Schneier teaches a public-key encryption process and system wherein the encrypting step uses an El Gamal encryption scheme (see Schneier col.1 lines 45-65).

Regarding **Claim 3**, Schneier teaches a public-key encryption process wherein the step of generating a digital signature comprises generating the digital signature using a Nyberg-Rueppel digital signature scheme; wherein the step of generating the

digital signature includes hashing the plaintext message (see Schneier col.1 lines 45-65).

Regarding **Claims 18, and 33**, Schneier teaches a public-key encryption process and system wherein the step of generating a digital signature comprises generating the digital signature using a Nyberg-Rueppel digital signature scheme (see Schneier col.1 lines 45-65).

Regarding **Claims 4, 19, and 34**, Schneier teaches a public-key encryption process and system, wherein the step of producing the ephemeral key pair comprises the steps of generating an encryption ephemeral private key x and calculating an encryption ephemeral public key $X = xG$, where G is a generator (see Schneier col.1 lines 28-44).

Regarding **Claims 5, 20, and 35**, Schneier teaches a public-key encryption process and system for encrypting messages for communication between a sender and a receiver, the process further comprising the steps of,

at the sender,

a) generating a sender private key a ; and

b) calculating a sender public key $A = aG$, where G is a generator,

and at the receiver,

a) generating a receiver private key b ; and

b) calculating a receiver public key $B = bG$,

wherein the sender obtains an authentic copy of the receiver public key B and the receiver obtains an authentic copy of the sender public key A (see Schneier col.1 lines 28-44).

Regarding **Claims 6, 21, and 36**, Schneier teaches a public-key encryption process and system, wherein the step of producing the ephemeral key pair comprises the steps of generating an encryption ephemeral private key x and calculating an encryption ephemeral public key $X = xG$ (see Schneier col.1 lines 28-44).

Regarding **Claims 7, 22, and 37**, Schneier teaches a public-key encryption process and system, further comprising the steps of, at the sender, generating a secret key $K = xB$ and encrypting a plaintext message using the secret key K to generate a ciphertext message (see Schneier col.1 lines 28-44).

Regarding **Claims 8, 23, and 38**, Schneier teaches a public-key encryption process and system, further comprising the steps of, at the sender, using the encryption private key x as a signature ephemeral private key and using the encryption ephemeral public key X as a signature ephemeral public key to generate a digital signature (see Schneier col.1 lines 45-65).

Regarding **Claims 9, 24 and 39**, Schneier teaches a public-key encryption process and system, wherein the digital signature comprises a first value r and a second value s , the process further comprising the step of, at the sender, transmitting the encryption ephemeral public key X , the ciphertext message and the second value s of the digital signature to the receiver (see Schneier col.1 lines 45-65).

Regarding **Claims 10, 25, and 40**, Schneier teaches a public-key encryption process and system, further comprising the steps of, at the receiver, generating the secret key $K = bX = bxG = xB$, decrypting the transmitted ciphertext message using the generated secret key K , calculating the first value r of the digital signature using the decrypted message and the transmitted encryption ephemeral public key X and validating the digital signature based on the calculated first value r and the transmitted second value s (see Schneier col.1 lines 45-65).

Regarding **Claim 11**, Schneier teaches a the public-key encryption process of Claim 1, wherein at least a two-stage public-key encryption process is used; wherein the first stage includes key establishment and the second stage includes encryption/decryption; wherein said steps (a) and (b) are performed during the second stage of encryption (see Schneier col.1 lines 45-65).

Regarding **Claims 12-15, 26-30 and 41-45**, Schneier teaches a public-key encryption process and system and its implementation in wireless hand-held communication devices within a communication system (see Schneier col.5 lines 8-40).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamara Teslovich whose telephone number is (571) 272-4241. The examiner can normally be reached on Mon-Fri 8-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Emmanuel Moise can be reached on (571) 272-3865. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
